Humana

TRANSITIONAL CONCURRENT CARE DECISION TREE
Humana Hospice VBID Model

Has Humana member elected the hospice benefit from an In-Network Provider? — **Yes** →

Was the member hesitant or reluctant to admit to hospice due to the forgoing of existing or contemplated treatments? — **Yes** →

If member goals are incongruent with hospice philosophy, TCC not appropriate

Are there services or treatments currently being provided, or recommended, by another healthcare provider? — **Yes** →

Are the contemplated services related to the terminal condition and related conditions? — **Yes** →

Is this a treatment or service that is generally considered covered under the hospice benefit, particularly if TCC was not an option? — **No** →

Are services considered to be curative in nature and generally not offered by hospice providers?

No ↓ TCC Addendum not needed as no TCC identified

No ↓ TCC does not apply when unrelated to the terminal and related conditions

Yes ↓ Hospice is responsible to provision of this treatment or service under the HMB.

No ↓ This is not TCC

Yes (horizontal) →

Will the provision of this service allow a member to conclude or phase out a course of therapy? — **Yes** →

Is the treatment of service appropriate to provide on a transitional basis, aligned with patient's wishes and provided by a non-hospice provider? — **Yes** →

Contact the Humana Hospice Clinical Team to discuss. →

Develop a plan of care to clearly identify the concurrent care services to be received.

Ensure this POC includes the tapering of curative treatment

→ Attach TCC Addendum to authorization to in Availity or send to HHCT secure email/fax →

Hospice IDT will ensure coordination among providers.

No ↓ (from "Will the provision...") May not be TCC Appropriate

No ← (from "Is the treatment of service appropriate...") May not be TCC Appropriate
